## **DETAILED ACTION**

### ***Drawings***

Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5, 8, 15-19, and 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art shown in Figures 1 and 2 (hereafter APA).

The APA discloses a valve controlling fuel flow in a turbine power generating system comprising a valve body with flow channel 100, a valve stem 111, a translator 113, a seal comprising annular members and a packing (the annular members of

schematically shown in square cross section around the valve stem 11 proximate the translator 113), and a shoulder portion 112.

### ***Allowable Subject Matter***

Claims 6, 7, 20, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-14 and 23-47 are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Van Nest, Nechanicky, and Schlesch references disclose similar valves.
